

LondrCoin Litepaper

1. Introduction

LondrCoin (\$LONDR) is a meme-rooted ERC-20 token built on Ethereum, combining fun internet culture with capped tokenomics and DeFi utility. Inspired by the service economy, LondrCoin rewards innovation, participation, and experimentation across decentralized platforms.

2. Tokenomics

- Max Supply: 420,690,000,000 LONDR
- Decimals: 18
- Initial Mint: 100,000,000,000 LONDR (23.8%)
- Contract Owner Controls Minting up to Cap
- Burnable via ERC20Burnable extension
- No inflation - capped forever at 420.69B

3. Contract Details

- Contract Address: 0x97d1A1b493D83A35A30d7D868e0e1D821F15D424
- Verified on Etherscan
- Built using OpenZeppelin (ERC20, Ownable, Capped, Burnable)
- Compiler: Solidity 0.8.26
- Optimized: No (for simplicity)

4. Vision & Use Cases

LondrCoin exists to fuel lightweight reward systems, meme tipping, and decentralized engagement. It can be integrated into service platforms, used for marketing games, or distributed through community contests. It is intentionally fun, and transparently limited.

5. Roadmap

- Q1 2025: Launch, Verification, and Initial Mint
- Q2 2025: Uniswap Pool, Token Listing Requests (CMC, CG)

LondrCoin Litepaper

- Q3 2025: Partner Airdrops + Community Events
- Q4 2025: Explore DAO Integration + Lockbox Tools
